

PRESS RELEASE

Trastor REIC achieves LEED GOLD certification for its new state-of-the-art commercial storage and distribution center in Aspropyrgos, Attica

Trastor REIC is pleased to announce the achievement of the prestigious international **LEED GOLD** certification for its new commercial storage and distribution center, with a total area of 24,109 sq.m. in Aspropyrgos, Attica. This success confirms the Company's commitment to creating properties that combine exceptional energy efficiency with a reduced ecological footprint. The new center is designed to provide a healthy and efficient workspace while minimizing environmental impact.

The completion of this project further enhances the Company's portfolio with certified "green" buildings and underscores its strategic focus on investing in properties that meet the highest international environmental standards and promote sustainable development.

Mr. Tassos Kazinos, the CEO of the company, stated:

"We are particularly proud to announce the achievement of **LEED GOLD** certification for our new state-of-the-art logistics center in Aspropyrgos, Attica. This significant recognition affirms our position as a leading institutional owner in the commercial warehouse sector and underscores our commitment to creating spaces of high energy efficiency and environmental responsibility. Additionally, this brings us closer to our goal of transforming our existing portfolio into green properties. We extend our warmest thanks to all our partners who contributed to this success. Our commitment to sustainable development and the implementation of green practices will continue to be at the core of our strategy. We look forward to advancing new, innovative initiatives and further strengthening our portfolio with projects that will define the future of sustainable development."
